

QUALITY, ENERGY, ENVIRONMENT, SAFETY POLICY

D05E0101

SIRPRESS aware of the importance of the Customer as a fundamental and vital asset of the Company, has decided to implement a Management System for Quality, Energy, the Environment and the Health and Safety in Workplaces and the continuous improvement of its processes, in accordance with the provisions of the respective Standards UNI EN ISO 9001:2015, UNI CEI EN ISO 50001:2018, UNI EN ISO 14001:2015, UNI EN ISO 45001:2023 and the IATF 16949:2016 Technical

Specification for the automotive sector.

Our MISSION

To be an excellent company recognized by the market for:

- leadership in the production of aluminum components by die-casting in high and low pressure and gravity, intended for the automotive sector
- the ability to understand and satisfy customer needs;
- the use of innovative technologies;
- slimness and flexibility;
- the motivation of its employees.

Our POLICY

- Customers first:** reaching or exceeding their expectations is our goal
- Quality:** to achieve customer satisfaction, the quality of our processes and services must be better than that of our competitors
- Energy efficiency:** for this purpose, Sirpress undertakes to apply and maintain an ISO 50001 Energy Management System which favors a systematic approach to efficient energy management, maintaining active procedures and work instructions aimed at reducing and guaranteeing the virtuous use of energy
- Reduced environmental impact:** for this purpose, Sirpress undertakes to apply and maintain an ISO 14001 Environmental Management System which favors a systematic approach to reducing the environmental impact of its products and activities, maintaining active procedures and work instructions aimed at reducing the organization's CO2 emissions and preventing accidental environmental pollution phenomena.
- Health, Safety and Security in the Workplace:** for this purpose, Sirpress is committed to maintaining an active Health and Safety Management System in the workplace ISO 45001 in order to ensure safe and healthy working conditions for the prevention of work-related injuries and illnesses, developing awareness of risks and promoting the absolute necessity of responsible behavior by every worker.
- Doing it right the first time:** it's the way to save time, energy and money by reducing the environmental impact of our processes
- The continuous improvement** of the quality of the processes, of the company's energy performance, of the environmental impact of the processes and the safety aspects of activities is our philosophy: we must aim for excellence in any of our processes/activities to provide superior value to our customers, through the definition of energy, environmental and health and safety objectives and targets
- The involvement of all staff is essential:** we must be a single team, the quality of our processes and services, the environmental impact, energy performance and everyone's health and safety management are the result of the determination with which this team conducts its choices and actions; Sirpress recommends that its people assume responsibility for their work
- Identification of roles and responsibilities** aimed at the continuous improvement of the energy performance, the reduction of the environmental impacts of the organization and the optimal management of health and safety aspects, also through the appointment of an Energy Environment and Safety Management Team and an Energy, Environment and Safety Contact.
- Compliance with the legislative provisions** applicable to the use of energy, energy efficiency, energy consumption, environmental impacts and the management of health and safety aspects in the workplace pertaining to the organization and the contractual obligations entered into by the company towards third parties

QUALITY, ENERGY, ENVIRONMENT, SAFETY POLICY

D05E0101

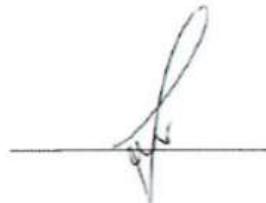

- Procurement and design:** Sirpress undertakes to purchase energy efficient and low environmental impact products and services that maintain the quality standards guaranteed to the customer, and to support design activities that aim to improve energy performance, quality standards and reduce the environmental impact of processes and to further ensure that the health and safety aspects of workers are always considered essential
- Create a collaborative business climate** through discussions and exchange of opinions to encourage a flow of information, suggestions, and collaborations, also to ensure that all activities are carried out safely
- Aim to **improve the professionalism** of its employees and collaborators by keeping internal personnel and the personnel of external companies operating on behalf of Sirpress continuously updated, spreading greater awareness on the use of energy, respect for the environment and safe working conditions with the help of internal and external training courses
- Social relations** must never be compromised: our activities are conducted in a socially responsible manner and must make positive contributions to the Society; we want to maintain mutually beneficial relationships with our Customers, our Suppliers and all our Collaborators and Partners
- Dissemination of the Quality, Energy, Environment, Safety Policy** at all levels of the organization and to the stakeholders

The Company Management undertakes to ensure compliance with this Quality, Energy, Environment and Safety Policy and to achieve the set objectives, providing for:

- Periodic verification of the effectiveness, adequacy and degree of application of the SGI
- Verification of continuous improvement of energy performance, process quality, environmental performance, of those concerning health and safety at work and related objectives and targets
- Provision of the resources and information necessary to achieve the defined objectives and goals
